PROFILE

Software Engineer with expertise in designing and delivering end-to-end software systems, from intuitive user interfaces to robust, scalable and reliable backend systems, database systems and business process automation. Committed to clean, maintainable code and delivering high-quality software that drives operational efficiency and business value.

WORK EXPERIENCE

Backend Engineer

Relia Tech Solutions | March 2025 - Present

- Designing and developing backend infrastructure for software systems.

Software Architect

Little App Kenya | June 2022 - Dec 2024

- Led and managed web development initiatives across multiple projects.
- Designed and developed a Human Resource Management (HRM) system to streamline employee records, attendance, and workflow processes.
- Designed and deployed new features for the Internal Technology Portal system, enhancing functionality and user experience.

Software Developer Intern

Little App Kenya | Feb 2022 – May 2022

- Implemented frontend development tasks, building responsive and user-friendly interfaces with design specifications.
